-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The original examiner of record erred in his restriction of claims. He should made a three way restriction and not a two way restriction over claims to a cement composition, a self leveling casting, and a method of molding. A self leveling "casting" is not a composition that belongs in class 106 nor did the original examiner get it right by wrongly inserting "cement compositions" in class 428 when this class is for coated substrates. Nevertheless, this additional restriction was necessary to correct the original examiner who did not bother to see if his restriction or where he was classifying was even remotely correct. The second examiner regrets that this is necessary but this must be restricted further and this written restriction was mailed to make it of record. The examiner did briefly talk to *Mr. Roland Long*, one of the attorneys believed to be of record. However, this was before it was realized that this case was not restricted by the present examiner and was improperly restricted.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 20, drawn to a cement composition, classified in class 106, subclass 724.
- II. Claims 17-19, drawn to a self leveling casting, classified in class 52, subclass 300+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b),

Art Unit: 1755

3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a coating, a building material or construction material, for walkway, paths, or roads, etc. and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Inquiries may be made to Paul Marcantoni at 571-272-1373.
